SUMMARY

Frontend developer who builds accessible, tested web apps and proves it with numbers. Latest project: Moringa, a Next.js marketplace with 100 in all four PageSpeed Insights categories, A+ on Mozilla Observatory and 337 automated tests.

SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML, CSS, Tailwind CSS, TanStack Query, Zustand, React Hook Form, Zod

Testing and quality: Playwright, Vitest, Jest, Testing Library, axe, Lighthouse CI, OWASP ZAP, WCAG 2.2 AA, test plans, exploratory testing, bug reports

Tools: Git, GitHub Actions, PostgreSQL, Prisma, Drizzle ORM, Stripe, Storybook, Figma, Vercel

Also: REST APIs in Python (Django REST Framework, FastAPI)

PROJECTS

Moringa, marketplace for Brazilian makers | moringa-silk.vercel.app | Oct 2026

- Built a two-sided marketplace for buyers and makers in Next.js, TypeScript and PostgreSQL, with Stripe Checkout in test mode, in Portuguese and English.
- Reached 100 in performance, accessibility, best practices and SEO on PageSpeed Insights, on mobile and desktop; Lighthouse runs on every pull request.
- Wrote 179 unit and integration tests and 158 Playwright end-to-end tests; a QA cycle with 58 traced test cases caught a pricing bug before launch.
- Reached A+ on Mozilla Observatory with a per-request CSP nonce, rate limits and CSRF checks; an OWASP ZAP scan in CI reports zero alerts.

Ipê, design system for React | npm: @rayssarrsilva/ipe | Oct 2026

- Published 11 accessible React components on npm, with design tokens synced from Figma, light and dark themes and a bilingual Storybook.
- Every story runs in Chromium with an axe audit on each pull request; documented QA cycle with 24 test cases and 6 bug reports.

DietGreen, meal planner by diet profile | Next.js, TypeScript, Prisma, Auth.js | 2026

- Food suggestions for 10 diet profiles and 5 goals, PDF and Excel export, OAuth sign-in; unit-tested domain layer; CI gates every merge.

Battleship, built test-first | JavaScript, Jest, Webpack | 2026

- 19 Jest unit tests written before the code; game logic apart from the DOM; GitHub Actions tests before every deploy.

EXPERIENCE

Web Developer, independent projects | Remote | 2023 – Present

- Plan, design, build, test and deploy the projects above end to end, with CI/CD on GitHub Actions.

Researcher, Technology Innovation Center (NIT), Uniube | Uberaba, Brazil | Jun 2024 – Apr 2025

- Supported software registration filings with INPI (Brazil's intellectual property office); built reports and dashboards in Google Sheets and Excel and supported technology events and trainings.

EDUCATION

Technologist Degree in Systems Analysis and Development, Universidade de Uberaba (Uniube) | 2023 – 2025
Capstone project, with a partner: Investly, a fixed-income simulator with a Django REST API.

TEACHING AND OPEN SOURCE

Instructor on Udemy: "Contribuição para Projetos Open Source Usando Git e GitHub" (course in Portuguese)
Contributor to The Odin Project curriculum: 2 merged pull requests (#31347, #31349)

CERTIFICATIONS

B1 English for Developers (freeCodeCamp, 2026) | GitHub Foundations (DataCamp, 2025) | Algorithms (Udemy, 2025)
